## SUPPORT HB 359 for REBEKAH ROGERS

Rebekah was in the car with her son and husband when she was **hit head-on by a driver going 70MPH**. The driver was immediately deemed at fault. However, he was underinsured, and his insurance did not cover her family's medical bills. Her son suffered a Traumatic Brain Injury, and her husband needed additional treatments. Rebekah thought she was covered with her **underinsured motorist coverage**. But her insurance company refused to pay. Rebekah was forced to take her insurance company to court. Meanwhile, the Rogers family maxed out their **credit cards and used their life savings to pay for their family's medical bills**. She was a loyal customer for her insurance company, paying her premiums each month. No Texan deserves to be treated like this. Tell insurance companies to #PayUp! **Support HB 359 by Geren!**
